About Orezone Gold Corporation

Orezone Gold Corporation (TSX: ORE OTCQX: ORZCF) is a Canadian mining company operating the open pit Bomboré Gold Mine in Burkina Faso.

Orezone is focusing on mining and processing the Phase I near surface free-dig oxides at a planned throughput of 5.9 million tonnes per annum (Mtpa). The Company recently released the results of its Phase II Expansion Study which envision an independent 4.4Mtpa hard rock plant operating alongside the existing oxide plant to deliver a significant increase in annual gold production at a low incremental capital cost. Construction of the new 4.4Mtpa hard rock plant will enable Bomboré to produce an average of 209,000oz/year at a mine-level AISC of \$1,121/oz for over 8 years. First gold from the Phase II expansion is scheduled for Q3-2025. Significant exploration potential exists to expand Bomboré’s mineral reserves through future resource conversion and new discoveries from drilling of promising high-priority targets.

Orezone is led by an experienced team focused on social responsibility and sustainability with a proven track record in project construction and operations, financings, capital markets and M&A.

The NI 43-101 Technical Report supporting the Phase II Expansion Study will be filed on SEDAR+ within 45 days of Orezone's news release dated [October 11, 2023](#).
